

## A bit about BRIT

The Botanical Research Institute of Texas (BRIT) is a global, scientific research and learning center focused on conservation and knowledge sharing. While our ever-increasing collections of plants and books are among the best in the world, we're most proud of our independent status. Separate from a university, garden or museum, our accessible collections inform and inspire people from all walks of life.

Everyone has the power to help save a species. BRIT explores, discovers and shares, all so you can create your own learning, leave your own legacy.
