A BIT ABOUT BRIT®

Founded in 1987 and based in Fort Worth, BRIT documents the diversity of plant life and conducts extensive research around the world. In the last 10 years, BRIT scientists have located and described scores of species previously unknown to science. Similar to the botanist-explorers of the 18th century, our scientists share the same desires and traits as Sir Joseph Banks, Captain James Cook, and Charles Darwin. We're adventurous, curious, passionate, independent, and smart. In addition, we are teachers. We're driven to find new plant species and research plant life for agricultural, economic, environmental, medical, and social uses and to share that knowledge in the classroom and the research laboratory.

STAY CONNECTED

Our corporate membership program was created with the goals of BRIT and the Fort Worth business community in mind to help you stay connected.

BRIT's Corporate Membership Program can help you:

- ◇ Invest in your community
- ◇ Influence our next generation of leaders
- ◇ Create an atmosphere of corporate philanthropy
- ◇ Support community development, education, and research
- ◇ Provide exciting benefits to your employees

Plant to planet.®

WHY CORPORATE MEMBERSHIP?

Reward your employees.

Let your employees know that you value and recognize their hard work by providing them access to BRIT, well as free admission and/or additional benefits at over 300 gardens throughout North America and the Cayman Islands, as part of the American Horticultural Society's Reciprocal Admissions Program (RAP). Build this corporate membership into an existing or new benefit or a reward system for your employees. We can be flexible to meet the specific needs of your company. When you reward or inspire your employees with a BRIT membership you are not only giving unlimited access to the institute, but also inspiring the next generation of leaders to care for our natural world.

Invest in your community.

As a corporate member at BRIT, you are helping to provide dynamic programming and exciting exhibits to your community and supporting critical world-class research within our scientific, educational, social, cultural, and business community. With your support we will be able to continue and increase our community outreach and inspire a new generation of life-long learners.

Support our mission.

BRIT's mission and passion is to conserve our natural heritage by deepening our knowledge of the plant world and achieving public understanding of the value plants bring to life.
